

Customer Journey Map

Journey Stage	Customer Actions	Thoughts	Emotions	Pain Points	Opportunities (ServiceNow Solution)
1. Identify Need	Employee realizes they need a network service (VPN, IP Address, Router/Switch Configuration, Device Onboarding, Network Relocation, etc.).	"I need this service to continue my work."	Concerned	Doesn't know the request process or whom to contact.	Provide a centralized Service Catalog with all network services.
2. Submit Request	Opens ServiceNow Service Portal and submits the required network request.	"I hope my request reaches the correct team."	Hopeful	Manual forms may be confusing or incomplete.	Easy-to-use catalog form with mandatory fields and validations.
3. Approval Process	Request is automatically routed to the approver.	"Will my request be approved quickly?"	Anxious	Approval delays and lack of communication.	Automated approval workflows with email notifications and reminders.
4. Request Processing	Network team receives and works on the approved request.	"I hope the issue is resolved soon."	Waiting	Manual task assignment and processing delays.	Automatic task creation and assignment through Flow Designer.
5. Track Request	Employee checks the request status in the Service Portal.	"I want to know the current status."	Curious	No real-time visibility into request progress.	Real-time status tracking and automated notifications.
6. Request Completion	Network team completes the request and closes it.	"My request has been completed successfully."	Satisfied	No confirmation or feedback collection.	Automatic completion notification and request closure confirmation.
7. Feedback & Improvement	Employee provides feedback on the service received.	"The process was quick and transparent."	Happy	Feedback is rarely collected in manual systems.	Customer satisfaction survey and performance reporting for continuous improvement.
