

Project Development Phase

Date	27 June 2026
Project Name	Automated Network Request Management
Maximum Marks	4 Marks

1.Introduction:

The Automated Network Request Management system is developed using the ServiceNow platform to streamline and automate network-related service requests within an organization. It enables employees to submit requests such as VPN access, IP address allocation, device onboarding, and network configuration through a centralized Service Catalog. The system automates approvals, task assignments, notifications, and request tracking, reducing manual effort and processing time. This solution improves operational efficiency, transparency, SLA compliance, and overall user satisfaction through an automated IT service management process.

2. Milestone 1: Catalog Creation

Objective

Establish a structured Service Catalog for network request management.

Activities:

- Identify different types of network requests.
- Create Service Catalog.
- Create Catalog Categories.
- Create Catalog Items.
- Provide meaningful names and descriptions.
- Organize request taxonomy according to ITSM standards.

Build and modify items faster with the improved Catalog Builder.

Catalog items are goods or services available to order from the service catalog. Items can be anything from hardware, like tablets and phones, to software applications, to furniture and office supplies.

- Enter a Name and Short description to display for the item.
- Enter a Price, approvals, variables, and other information as needed.

Owner:

Item Details | Process Engine | Picture | Pricing | Portal Settings

Short description:

Description:

Rich text editor with toolbar (Bold, Italic, Underline, Link, etc.)

Milestone 2: Form Setup

Objective

Design dynamic forms to collect all necessary request information.

Activities:

- Create Catalog Variables.
- Configure Variable Sets.
- Implement Catalog UI Policies.
- Configure mandatory fields.
- Apply field validation.
- Enable dynamic show/hide functionality.

Variables (10) | Variable Sets (1) | Catalog UI Policies (1) | Catalog Client Scripts | Available For | Not Available For | Categories (1) | Catalogs (1) | Catalog Data Lookup Definitions | Related Articles | Related Catalog Items

1 to 10 of 10

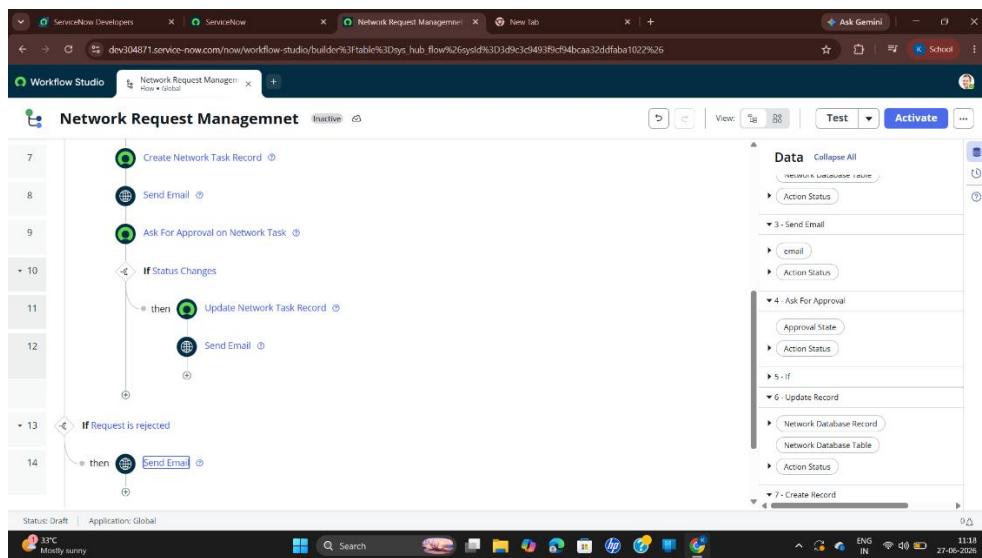

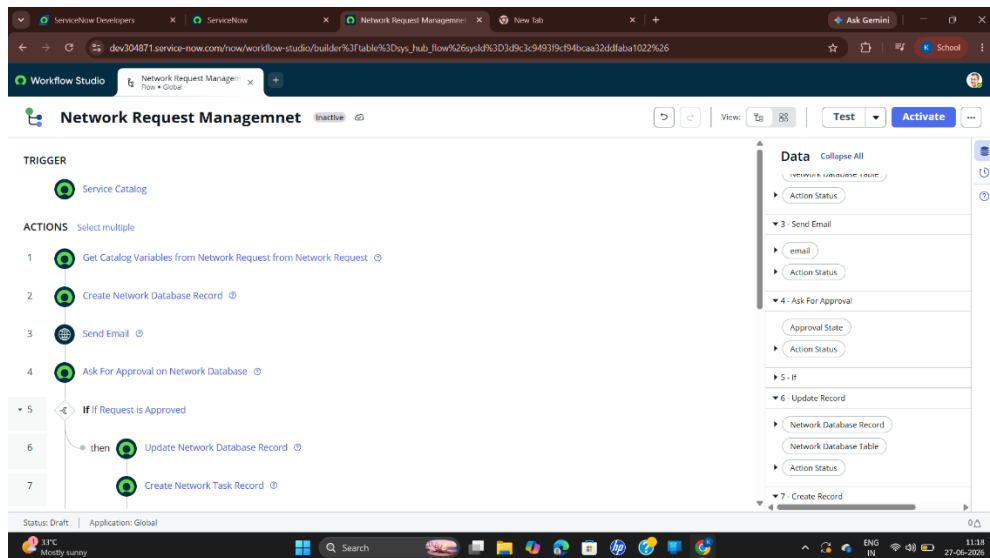

Milestone 3: Approval Integration

Objective

Automate approval workflows before request fulfillment.

Activities:

- Configure approval hierarchy.
- Create Flow Designer approval actions.
- Implement manager approvals.
- Enable email notifications.
- Maintain approval audit logs.

Milestone 4: Testing

Objective

Validate the complete automation workflow.

Activities:

- Unit testing.
- Catalog testing.
- Flow testing.
- Approval testing.
- Notification testing.
- End-to-end request execution.

EXECUTION DETAILS		Network Request Management		Test Run - Completed	Open flow	Open context record
Show Action Details			State	Start time		
FLOW STATISTICS		Run as: System Administrator	Open flow logs	Completed	2026-06-28 03:21:54	798ms
TRIGGER Catalog Item Requested						
ACTIONS						
1	Get Catalog Variables from Network Request	Core Action	Completed	2026-06-28 03:21:54	117ms	
2	Create Record	Core Action	Completed	2026-06-28 03:21:54	28ms	
3	Send Email		Completed	2026-06-28 03:21:54	59ms	
4	Ask For Approval	Core Action	Completed	2026-06-28 03:21:54	387ms	
5	If Request is Approved	Flow Logic	Evaluated - True	2026-06-28 03:22:40	203ms	
6	Update Record	Core Action	Completed	2026-06-28 03:22:40	15ms	
7	Create Record	Core Action	Completed	2026-06-28 03:22:40	11ms	

Milestone 5: Deployment

Objective

Deploy the application for organizational use.

Activities:

- Validate configurations.
- Publish catalog items.
- Monitor workflow execution.
- Train end users.
- Monitor post-deployment performance.
